Environment Matters – 21 April 2017 Edition 298

Welcome to Aardvark's environmental news briefing

- Flight turbulence to get three times more common because of CO2:Turbulence strong enough to bounce
 unbuckled passengers around an aircraft cabin could become three times more common as carbon dioxide
 levels in the atmosphere rise, experts predict. (newscientist.com 06/04/2017)
- Receding glacier causes immense Canadian river to vanish in four days: First ever observed case of
 (river piracy' saw the Slims river disappear as intense glacier melt suddenly diverted its flow into another
 watercourse. (theguardian.com 17/04/2017)
- Renewables' deep-sea mining conundrum: British scientists exploring an underwater mountain in the Atlantic Ocean have discovered a treasure trove of rare minerals. (bbc.co.uk 11/04/2017)
- Green Investment Bank to be sold off in £2.3bn deal: Bank expected to retain offices in London and Edinburgh, as bid from Australia's Macquarie accepted despite opposition. (theguardian.com 20/04/2017)
- Repairs to £190k motorway bridge for EU-protected dormice could cost £63k: A Welsh council could be
 forced to spend £63,000 repairing a bridge for dormice because they are an EU-protected species.
 (telegraph.co.uk 18/04/2017)
- Energy UK joins calls to back 'pot one' technologies: Energy UK has called on ministers to support
 established renewable technologies, like onshore wind and solar, in order to provide a better deal for
 customers. (edie.net 19/04/2017)
- Ridding the oceans of plastics by turning the waste into valuable fuel: Billions of pounds of plastic
 waste are littering the world's oceans. Now, an organic chemist and a sailboat captain report that they are
 developing a process to reuse certain plastics, transforming them from worthless trash into a valuable diesel
 fuel. (sciencedaily.com 03/04/2017)

And finally...

• Renewables roadshow: how the people of Newtown got behind solar-powered beer: A hipster brewery in a Sydney suburb has created beer with an environmental message. (theguardian.com 19/04/2017)

Latest news from the Aardvark team

Aardvark has successfully secured an environmental permit for the restoration of a former sand quarry in Devon. The 1.38ha former quarry will be restored to comprise heathland, mixed woodland and grassland. The Aardvark team have worked closely with the Environment Agency to ensure that the proposal meets with the waste recovery principle, and that any potential environmental risks to the underlying aquifer are appropriately managed. For all the Aardvark news go to www.aardvarkem.co.uk.
