

# Case Study

## Compliance with the CRC Scheme Woodard Schools

Ongoing project since 2010

### Objectives

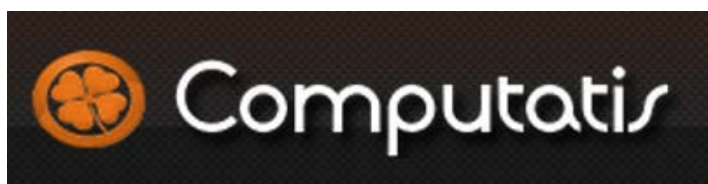

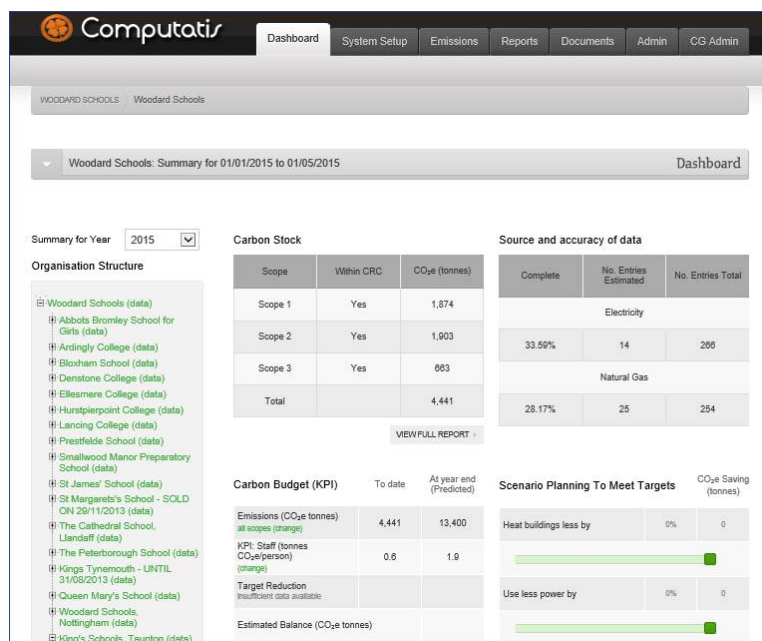

- Achieve full compliance with the Carbon Reduction Commitment Energy Efficiency Scheme
- Calculate the GHG emissions associated with electricity and gas consumption and produce an Annual Report
- Maintain the Evidence Pack and keep track of all organizational changes

### Client

- Woodard Schools

### Delivery

- Collect all energy consumption data and the associated evidence in our software system Computatis
- Review and sense-check all data to ensure audit-proof precision
- Convert kWh into tonnes of CO<sub>2</sub> with the latest emission factors published by the EA and embedded in Computatis
- Produce the Annual Report and submit it to the EA by the deadline. Order the correct number of allowances and make sure they are paid for and delivered
