

Case Study

Combined IVC/AD Waste Facility Dagenham

Completion due: June 2015

Objectives

- Secure PAS100 Accreditation for 19,000tpa in-vessel composting process
- Secure PAS110 Accreditation for 30,000tpa anaerobic digestion plant
- Develop a workable Maintenance Management Program

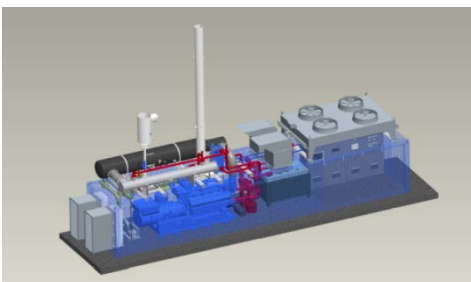

Client

- East London Biogas OpCo Ltd
Dagenham

Delivery

- Carry out internal audits to monitor process management of the combined IVC and AD facility; remedying any shortfalls with analyses and reports.
- Prepare and submit comprehensive QMS as part of PAS100 & PAS110 compliance.
- Create and implement - in collaboration with site management - effective maintenance management program.
- Modify Process Parameters to enhance biogas production and compost/digestate manufacture.
